Key features of Portable Concrete Barrier Markers

- ◆ Brite-Max BMJBs are becoming DOT approved nationwide in states which prefer durable aluminum over plastic!
- ◆ Plastic PCBM's meet specifications nationwide.
- ◆ Also known as a "Jersey" Barrier Marker. Typical applications include temporary and permanent concrete barriers, concrete bridge parapets and wooden guardrail posts. BMJB bases are pre-drilled for either adhesive or bolt mounting.
- ◆ **Installation:** BMJBs have 3/8" holes pre-drilled for permanent 5/16" hardware installations. Use adhesives for a quick, reliable and less labor intensive installation. Standard pavement marking adhesives are available for purchase. Also, Dapco brand 795A Adhesive (RPMAEPOXYTUBE1P) is available through special order by calling customer service at 1-800-367-1492.

MUTCD Guidance

About Delineators

- ◆ Delineators are beneficial at locations such as at lane-reduction transitions and curves and provide effective guidance at night and during adverse weather conditions. Refer to the MUTCD for more information.
- ◆ Retroreflective elements for delineators shall have a minimum dimension of 3 inches.
- ◆ Delineators are considered guidance devices rather than warning devices.
- ◆ Delineators may be used on long continuous sections of highway or through short stretches where there are changes in horizontal alignment.

Color Definitions

- ◆ **WHITE:** Lane markings or to mark the right pavement edge.
- ◆ **YELLOW:** Separate traffic moving in opposite directions, or mark the left pavement edge on one-way roadways.
- ◆ **RED:** Used to warn motorists of "Do Not Enter" or "Wrong Way". Also, delineators shall be red when used on a truck escape ramp.
- ◆ **BLUE:** Used to mark the location of fire hydrants on the shoulder or at the curb.
- ◆ **GREEN:** Used for snowplow markings.
- ◆ **ORANGE:** Used in construction work zone areas.

In accordance with MUTCD Tubular Markers versus Tube Delineators

Delineator: a retroreflective device mounted on the roadway surface or at the side of the roadway in a series to indicate the alignment of the roadway, especially at night or in adverse weather.

Tubular Markers may be effectively used for emphasis of pavement marking patterns including • opposing lane dividers of traffic • dividing traffic when two or more lanes are kept open in the same direction • channelizing traffic in exit only applications • urban turn restrictions • indicating changes of alignment in the roadway • delineating edge of pavement drop off where space limitations do not allow the use of larger systems.

- ◆ Shall be made of a material that can be struck without causing vehicle damage.
- ◆ Day and low speed roadways (40 MPH or less). Requirements: 18" minimum height with at least (1) one 3" retro-reflective stripe.
- ◆ Night and high speed roadways (45 MPH or higher) Requirements: 28" minimum height with (2) two retro-reflective stripes that are between 2" - 3" wide.
- ◆ Channelizer Stripes shall begin 2" from the top and have 2" - 6" between stripes
- ◆ Marker Tube Diameter shall be a minimum of 2" with 2" - 3" outside diameters being the most common.
- ◆ Tubular Markers shall have permanently affixed bases or have weighted portable bases.
- ◆ Lane separators shall be crashworthy.
- ◆ In TTC work zones, Tubular Markers should only be used where space restrictions do not allow more visible devices.

Helpful Hint:

- ◆ White Reflective Sheeting separates same direction traffic flow or supplements right edge white lines.

PART 2: Easy Order Checklist - Mounting Bases

PART 1: Easy Order Checklist - Premium Tops

Follow the steps below to **build your own multi-purpose premium tubular marker or tube delineator** to suit your specific needs.

STEP 1 Choose a Tube Style

- ☐ **Tubular Marker** - 2.375" OD tube for use as a channelizing device. Short squeezed top keeps out weather and debris. Comes with 2 bands of HIP reflective stripes.
- ☐ **Tube Delineator** - 2.375" OD tube is flattened into a long squeezed top for use as a delineator. Comes with 1 or 2, 3" x 12" HIP reflective decals.

NOTE: The 2.375" Multi-Purpose Post is most commonly used with 3" and 4" Tuff Post also available.
