

CPC Standard Color Chart

Standard CPC color combinations may be found on the following pages of this document. Noted Pantone equivalents are within a high tolerance color match standard, set by the CPC art department under neutral light conditions. Please note that all colors vary in appearance on different substrates and under different light conditions. Digital colors vary from screen to screen and should not be chosen by screen color when an exact match is required. If an exact color match is critical, further assistance and information regarding our Branding Program is available thru the customer service department. Call for pricing and details on the Branding Program and our Pantone color matching service options at 1-800-367-1492.
